Position within EULAR/international experience:

EMEUNET member

Fellow of EULAR task force on 'RA management' in 2009

Areas of Research/Interest:

RA phenotype (nl. joint destruction)

Repeated measurements analysis

Genetic variability

Select Publications:

I just recently started my PhD which means that I haven't published anything yet. However, there is a lot of work in progress. Currently, two publications of which I am first author are submitted to ARD, a third will be submitted next month and a fourth is still in progress but will be submitted within the next months. One article is submitted of which I am second author.
