

## EULAR Study Group on Social Media for Rheumatology Healthcare Professionals (SoMeR)

### Background & Aim:

The proposed EULAR Study Group (SG) aims to explore the current landscape of social media by rheumatology professionals, while supporting global scientific exchange, reducing disparity in educational opportunities online, and provide future generations with the opportunity to channel time spent on SoME platforms into accredited professional development.

We envision that the study group will offer professionals the platform to conduct a workshop and qualitative synthesis to define a credible, value-added SoME learning event. These objectives are aligned with the vision to develop evidence based international recommendations for safe and appropriate use of SoME, including, where possible, academic accreditation for those who engage with such events. The study group has support from other regional rheumatology leagues aside from EULAR. The SoMeR initiative brings the unique opportunity to bridge communication gaps among rheumatology professionals across the globe, while establishing the foundation for novel future educational approaches. The study group leads are established researchers with a credible academic profile and organisational leadership experience in furthering communications and social media network worldwide.

### Study Group Lead:

Latika Gupta

Consultant Rheumatologist, Department of Rheumatology, Royal Wolverhampton Hospitals NHS Trust, Wolverhampton, UK

Senior Lecturer (honorary, teaching and research), Division of Musculoskeletal and Dermatological Sciences, Centre for Musculoskeletal Research, School of Biological Sciences, The University of Manchester, Manchester, UK.

Co-Chair EMEUNET and APLAR Young Rheumatology social media.
