

Testimonial full online course

I concluded the EULAR On-line Course in October 2013. Since I had my Rheumatology training final exam in October 2013, which also included a theoretical exam, this course would offer a good opportunity to help me consolidate my knowledge.

The course is well organized and most modules are very well written, usually by prominent people in the respective field, and they are easy to read and study. Most modules are up-to-date and include information from very recent studies/papers. After each module you have a questionnaire, which works as a preparation for the final evaluation (exam) and also a form of self-assessment. The final evaluation (exam) of the Online Course was neither easy or too hard, but fair. The time was short I must say, but enough to complete the task at hand. Overall the course is very good and it was quite useful to me, not only helping to structure my knowledge but also providing well written, updated and comprehensive study texts. I think all Rheumatology trainees should do it at some point in their training. In fact, I would also consider it useful for Rheumatology specialists who wish to refresh their knowledge.
