

Module	Name
1	Systematic approach to diagnosis
2	Early arthritis: diagnosis and management
3	Rheumatoid arthritis: pathogenesis, clinical aspects and diagnosis
4	Rheumatoid arthritis: treatment
5	Immunology and the rheumatic diseases
6	Seronegative spondylarthropathies: pathogenesis, clinical aspects and diagnosis
7	Seronegative spondylarthropathies: treatment
8	Measure of disease activity and damage in inflammatory arthritis
9	Juvenile Idiopathic Arthritis (JIA)
10	Miscellaneous inflammatory arthritides: Adult Still disease, sarcoidosis, palindromic rheumatism, paraneoplastic arthritis, hypertrophic osteoarthropathy
11	Infection and arthritis. Reactive arthritis, Lyme, Whipple, HIV, viral arthritis, Hepatitis C, ...
12	Crystal arthropathies and septic arthritides, Gout
13	Clinical epidemiology - Critical appraisal of evidence
14a	Genetics for rheumatologists
14b	Psycho-social dimensions of the rheumatic diseases
14c	Clinical epidemiology - Impact of the rheumatic diseases
15	Imaging, including ultrasound
16	Connective tissue diseases: Concepts and pathogenesis, overlap syndromes, mixed CTD and undifferentiated CTD
17	Systemic lupus erythematosus: pathogenesis, clinical manifestations and diagnosis
18	Systemic lupus erythematosus: treatment
19	Pregnancy related problems in rheumatic diseases, including the anti phospholipid syndrome
20	Systemic sclerosis
21	Polymyositis, dermatomyositis
22	Sjögren's syndrome, Lympho-proliferation in autoimmune diseases
23	Classification of vasculitis and secondary vasculitis and vasculitis mimics
24	ANCA-associated vasculitis and polyarteritis nodosa

25	Behçet's disease, polychondritis, eye symptoms in rheumatic diseases
26	PMR
27	Systemic consequences of the inflammatory process: amyloidosis, anemia, atherosclerosis
28	Rheumatic manifestations of systemic diseases/miscellaneous rheumatic diseases
29a	The skin and the rheumatic diseases
29b	Molecular and cellular basis of tissue destruction
29c	Rheumatic manifestations of tropical diseases
30	Osteoarthritis: pathogenesis, clinical aspects and diagnosis
31	Osteoarthritis: treatment
32	Low back pain (including sciatica and DISH)
33	Regional pain syndromes (including reflex sympathetic dystrophy)
34	Generalized pain syndromes (including Fibromyalgia and chronic fatigue syndrome)
35	Osteoporosis: pathogenesis, clinical aspects and diagnosis
36	Osteoporosis: treatment
37	Other bone diseases: osteomalacia, Paget's disease, renal osteodystrophy, osteomyelitis, osteonecrosis
38a	Autoinflammatory syndromes
38b	Systemic manifestations of primary immune deficiencies and FAS deficiencies
38c	Malignant bone diseases (including new concepts and therapies as they apply to rheumatic diseases)
39	Pain: mechanisms and management
40	Principles of rehabilitation
41	Glucocorticoids
42a	Cryoglobulinemia and systemic manifestations of hepatitis C virus
42b	Cell and gene therapy in rheumatic diseases
42c	Neuro-endocrin-immunology

Module numbers and names may be subject to change.
