

## EULAR Study Group on Systemic Autoinflammatory Diseases

The Study Group on Systemic Autoinflammatory Disorders will be open to the contribution of any new Applicant among clinicians, researchers, allied health professionals and patients from European and non-European Countries. The study group shall meet at least annually during the EULAR Congress. Ordinary communication between members will be maintained throughout the year by e-mail.

### Objectives:

1. Creating and maintaining a network of clinicians and researchers working on autoinflammatory diseases;
2. Promoting the development and the growth of international clinical registries of great clinical impact as the foundation for future research on autoinflammatory diseases;
3. Providing regular updates on translational and clinical research in the field of autoinflammatory diseases;
4. Facilitating the conduct of international studies designed by the Members of the study group;
5. Providing high level education initiatives, with specific attention to younger professionals approaching the field of autoinflammatory diseases;
6. Initiating and coordinating the educational offer for students, health professionals and patients in the field of interest.
